FOREIGN AID AND DEVELOPMENT IN PALESTINE

-

Preface

This report represents the conclusion of the first phase of a three-phase research project focusing on the donor initiative in the West Bank, including East Jerusalem, and the Gaza Strip. The two main objectives of this project are a) to shed light on the current debate, acrimonious and otherwise, between the donor community and the Palestinians on whether or not donors are fulfilling their commitments; and b) to examine whether the funds being given by the donor community are being used in a constructive way which will help ensure sustainable development, or whether they are helping to create structural dependency instead.

Thus, the aim of the first phase of the project is to provide information on the current status of the development initiative, how much money is being donated and by whom, and to what sectors it is being allocated.

The aim of the second phase is to present analysis, stimulate debate, and highlight differences of opinion about two main aspects of the donor initiative: the qualitative contributions of the donor community; and the way in which this money is being used by the Palestinians. Of particular interest is the development policies [if any] and various agendas, whether Palestinian or foreign, in place. The aim of the project's third and final phase is the formulation and presentation of various policy recommendations by development and economic experts and other specialists, whether academics, government officials or NGO representatives.

The report presented here is the first of three, and represents the results of the first information-gathering phase. It concentrates primarily on providing as much information as possible on the scope of the development effort in the West Bank and Gaza Strip, including funds pledged, committed and disbursed; the share of funds according to donor countries and multilateral; and the sectoral allocation of funds. It should be noted that while this report was intended to be as comprehensive as possible, we did encounter some discrepancies and inconsistencies between various donor sources and certain difficulties in obtaining information from Palestinian Authority sources at times.

FOREIGN AID AND DEVELOPMENT IN PALESTINE

1. INTRODUCTION

The two parties view the economic domain as one of the cornerstones in their mutual relations with a view to enhance their interest in the achievement of a just, lasting and comprehensive peace. Both parties shall cooperate in this field in order to establish a sound economic base for these relations, which will be governed in various economic spheres by principles of mutual respect of each other's economic interests, reciprocity, equity, and fairness.

Preamble of the Protocol on Economic Relations between the Government of Israel and the PLO, representing the Palestinian people.

WITH THE SIGNING of the Declaration of Principles on Interim Self-Government by Israel and the PLO, redeployment from the major Palestinian towns, and the ongoing peace negotiations, the Palestinian people are emerging from years of Israeli military occupation to face a dubious political and economic future whose potential remains deeply scarred by that occupation. High hopes and expectations have been placed on the current peace process and the economic development and growth envisioned. Yet there are huge obstacles to be overcome.

The international donor community has recognized that improved living conditions, rebuilding the infrastructure of the West Bank and Gaza Strip, and the building of necessary institutions are all elements vital to the success of the new era of peace envisaged by the DOP. Therefore, the international community met in Washington on October 1, 1993 at the US-hosted Conference to Support Middle East Peace. This conference concluded with pledges to the Palestinians from the donor community amounting to the amount of US\$2,996.32 million¹, to be disbursed over the five-year period 1994-98.

The development process in the West Bank and Gaza Strip has traditionally been linked to the political situation, and the current political

uncertainty is reflected in the current economic/donor situation. The West Bank and Gaza Strip remain in need of assistance. That assistance has been directly linked to perceived progress in the peace negotiations, to demands from donors for transparency and accountability in the structures of the Palestinian Authority (PA), and to the various priorities being set by individual governments and multilateral organizations (e.g., World Bank, International Monetary Fund, United Nations).

In sum, there is lack of consistency on all sides as to the current and actual state of the PA's finances, actual levels of foreign assistance – pledged and disbursed – and how and to what projects these funds have been disbursed. There is an urgent need to gain a greater understanding of this situation, as transitory structures become more permanent, and as a Palestinian development strategy materializes on the ground. Furthermore, it is vital that the population at large feel confident that this development strategy is one that will not contrive structural mechanisms which will prevent people from equal access to higher education, better jobs, and the basic human right to support themselves and their families at a level above subsistence.

Within this context, the Jerusalem Media and Communication Centre (JMCC) has established this project entitled "Foreign Aid and Development in Palestine", which is supported by NOVIB. The overall aim of the project is to help in establishing an acceptable level of accountability vis-à-vis the funding of Palestinian development. Further, it is hoped that the provision of this information will serve as the first step in establishing a forum and stimulating discussion concerning economic development and the role of the donor community in the Palestinian arena. The first part of this project is not meant to be analytical in nature, but essentially is a compilation of various materials pertaining to the donor community and the Palestinian economy². Donor activity

FOREIGN AID AND DEVELOPMENT IN PALESTINE

- pledges, commitments, disbursements - as well as sectoral concentrations for the period 1994-96 are discussed in some length. Furthermore, an appendix of relevant source materials has been added to help shed some light on the current economic development situation in the West Bank and Gaza Strip.

In the second phase of this project, using the data gathered and the input of experts and policy-makers in the field, we will try to identify and prioritize the key issues relevant to the responsible use of funds received, through interviews, workshops, and other fora. Additionally, it is hoped that the discussion and analysis of this second phase will help to determine the respective roles of the PA, NGOs, and international donors and agencies within the development process in Palestine, and encourage communication between all parties on how to strike a balance between short-term needs and long-term sustainability. It is the goal of the JMCC that by the third and final phase of the project, a forum will have been firmly established in which relevant issues and strategies can be discussed in depth. Based on this premise, various components of the development process will be prioritized and policy guidelines and recommendations will be formulated and published.

It should be noted that in the course of gathering data for this report, there were frequent discrepancies between sources, and information was not always easy to obtain. These difficulties were exacerbated by differences in categorizations, definitions and standards. We are hopeful that this report will clarify such ambiguities, although the accuracy of secondary sourcing cannot always be guaranteed.

2. PLEDGES

ACCORDING TO FIGURES put out by the AHLC Secretariat in November 1996, pledges made in the period 1994-96 totaled US\$2489.55 million³, with the major donors the EU (12.48%), the United States (9.33%), Japan (10.29%), Saudi Arabia (8.64%), Norway (5.65%), Netherlands (4.85%), Germany (3.73%), Italy (3.6%), Switzerland (3.1%), and France (2.9%).⁴ Additionally, some countries may have contributed indirectly through other channels and hence their contributions are underestimated.

In looking at the donor community, countries are divided into five categories: the Arab world, Europe, Japan, North America and Other Countries.

2.1 The Arab World

Total pledges of the Arab countries and the Arab Fund amount to \$393.41 million, approximately 15.8% of total pledges for the period 1994-96. Seven Arab countries, in addition to the Arab Fund, pledged to financially assist the Palestinians. Of these countries, Saudi Arabia is the major Arab donor, accounting for 54.65% of total Arab pledges. Kuwait and the United Arab Emirates both come after Saudi Arabia, each accounting for 6.35% of total pledges.

The Arab countries did not pledge or guarantee any assistance in the form of loans.

2.2 Europe

The category of Europe includes both the western and eastern parts, although Eastern Europe's contributions to the donor effort have been minimal. The only two Eastern European countries from the former COMECON to pledge

10

FOREIGN AID AND DEVELOPMENT IN PALESTINE

any assistance to the donor effort towards Palestine are the Czech Republic and Romania, which together pledged \$5.88 million, less than 1% of the total amount pledged by European countries. The total amount pledged by Europe as a region is \$1258.58 million, approximately half of all donor assistance pledged to the Palestinians in 1994-96⁵. Of this amount, \$817.86 million was pledged by the 19 European countries; \$310.72 was pledged by the European Union (EU); and \$130 million was pledged in the form of loans by the European Investment Bank (EIB). All the European countries, with the exception of Cyprus, the Czech Republic, Romania and Switzerland, and Norway are part of the EU and therefore have made contributions both as individual countries and through the EU.

Of the European countries, Norway is the major donor country (17.18%) followed by the Netherlands (14.75%), Germany (11.37%), Switzerland, (8.57%), Sweden (8.5%) and France (7.95%)⁶. (For a breakdown of the remaining pledges of European countries refer to Appendix II.) The EU's proposed plan of action has focused on three areas: political, institutional, and economic empowerment. In terms of political empowerment, the EU has focused on drafting the electoral law, the establishment of national and district election offices, the establishment of a press office, the designation of polling districts, civic education campaigns, training election officers and the provision of electoral equipment. Significant technical and financial support has also been given to the new administration of the Palestinian Authority (PA), including considerable grant resources to the running costs and other recurrent expenses universities and community colleges, primary and secondary-level of the PA. education, the police force and the rehabilitation of ex-detainees. Additionally, the European Union introduced to the international community the idea of the Tripartite Action Plan (TAP)⁷ in order to help balance the PA budget deficit. On

FOREIGN AID AND DEVELOPMENT IN PALESTINE -

25 April 1995, the PA, Israel, and the international donor community agreed on the TAP, which obliges all parties to actively address the structural deficits of the PA.

2.3 Japan

Japan will be looked at as an individual country and not as part of the Far East, South and East Asia region, since it is the only country in the region playing a major role in the Middle East donor effort. Therefore, the contributions of Brunei, India, Indonesia and the Republic of Korea will be looked at in the category of Other Countries.

Japan is currently chairing the Environment Working Group and cochairing the Regional Economic Development, Water, and Refugees Working Groups. Japan also played a key role in formulating the Environmental Code of Conduct for promoting regional cooperation to protect the environment in the Middle East. Although Japan's contributions to the donor effort are significant, its delivery of international assistance was, *inter alia*, complicated by legal restrictions. Japan found itself bound by domestic legislation limiting its assistance to international organizations and recognized states, thus excluding the PA. To overcome this restriction, the Japanese have had to channel assistance through UN agencies instead.⁸ Other donors have also faced the same problem of assistance delivery because the West Bank and Gaza Strip do not have nation-state status.

2.4 North America

This category is comprised of the United States and Canada. The US has pledged \$232.17 million, and Canada \$33.98 million or 12.77% of the total North American contribution. US grants are administered through the United

- - - - - - - - -

States Agency for International Development (USAID). As with Japan, the US assistance program to the Palestinians is subject to legal restrictions. US legislation prohibits direct US assistance to the PA, and mandates USAID support for the establishment of cross-border industrial parks (despite a preexisting legislative ban on USAID projects that might result in competition with US manufacturers). Furthermore, congressional suspicion of the PLO meant that the assistance program was subject to periodic congressional review and a legislative requirement for periodic certification by the State Department of Palestinian compliance with the Oslo Agreement. Another dimension to the US assistance program is the institutional challenge. Pre-Oslo US aid had been limited, and for domestic political reasons largely channeled through a select group of US private voluntary organizations rather than administered directly. "Scaling up" from previous levels is not a simple task. The USAID had to rapidly expand its infrastructure on the ground, with internal bureaucratic and political struggles arising over such issues as staffing levels, location (East Jerusalem versus Tel Aviv), and line authority.⁹

Much of USAID's assistance has been directed to the start-up costs of the Palestinian Authority's operations and high-priority infrastructure. Furthermore, "...the program, as part of an overall country team approach, addresses crucial US national interests in the Middle East by promoting marketoriented economic development and the emergence of democratic institutions. These efforts will help lay the groundwork for long-term economic stability, a sine qua non for the viability of the new Palestinian entity and its peaceful relations with Israel and its neighbors."¹⁰

2.5 Other Countries

This category includes Australia, Iceland, Israel, Turkey and Other Asian countries – Brunei, India, Indonesia and the Republic of Korea. Of these countries, Israel and Turkey are the largest donors: Israel has pledged \$44.5 million, only exceeded by Turkey with pledges of \$52.86 million. Australia pledged \$13.01 million in grants, about 0.6% of the total pledged. Pledges made by Other Asian countries amount to \$15.26 million, 0.61% of total pledged assistance.

2.6 Loans Pledged

Information pertaining to loans has not been easy to obtain. According to figures released at the October 1993 Conference to Support the Middle East Peace Process, the estimated amount of total loans pledged is \$760 million, approximately 25.36% of total pledges. The largest lender to the Palestinians is the European Investment Bank, which initially pledged \$300 million, 39.47% of total loans. Up to November 1996, however, only \$150.5 million of this amount has been committed to any projects. Second to the EIB is the World Bank at \$140 million in loans pledged, 18.4% of the total loan amount. This entire amount has been committed to various projects.

The US pledged \$125 million in loans which comprises16.5% of the total loans pledged. These are being administered by the Overseas Private Investment Corporation (OPIC). The International Finance Corporation (IFC) pledged \$70 million (9.2%), Israel and Turkey \$50 million (6.6%) each, Greece \$15 million (almost 2%), and the Republic of Korea \$10 million (1.3%).¹¹

As evidenced by the figures, Europe is the largest donor in terms of grants and loans pledged. The EU invited the PA to participate as a full partner in the Euro-Mediterranean Ministerial Barcelona Conference of November 1995.

This conference marked the beginning of the establishment of a free trade area and a substantial increase in financial cooperation between the EU and Mediterranean partners.¹²

The EIB is now the largest international financial institution in terms of borrowing and lending. The EIB has established a credit line through the Cairo-Amman Bank and the Arab Bank. This effort is a significant part of the EIB's Redirected Mediterranean Policy (RMP) aimed at enhancing its work in the Mediterranean countries. Furthermore, loans available for environmental projects will be made at lower interest rates of 2-3% and will be subsidized by the EU.

At the October 1993 Conference to Support the Middle East Peace Process, the US pledged \$125 million in loans, to be made available in the form of private sector guarantees administered by the Overseas Private Investment Corporation. OPIC is a self-sustaining US government corporation, created in 1971 to promote private-sector investment in foreign economies through loans, loan guarantees, and political risk insurance. These loans will be made available to Americans investing in the region over a five-year period. "Private sector foreign investment is an effective tool of US foreign policy, while assisting in the economic development of emerging nations, said Ruth R. Harkin, president and chief executive officer of OPIC."¹³

To further strengthen the region's economy, OPIC is encouraging projects in the Jordan Rift Valley, territory linking Israel, Jordan and PA areas, in hope that regional economic cooperation will be increased. In December of 1995, OPIC disbursed the first tranche of a \$2 million commitment to Bucheit International of Ohio, which operates a pre-cast concrete manufacturing facility in the Gaza Strip. OPIC was also negotiating other investment projects in the bottled water and hotel sectors.

The World Bank and the International Finance Corporation (IFC) together pledged \$188.75 million in loans, approximately 7.58% of total pledges. The IFC was established in 1956 as a new member of the World Bank Group. It places particular emphasis on promoting economic development and encouraging the growth of the private sector and efficient capital markets. It is the largest multilateral lender, having provided funds of over \$16 billion to 114 countries. Currently, the IFC is in the process of activating a project in the West Bank and Gaza Strip to provide support to the Arab Palestinian Investment Bank.

The World Bank has been a key player in the donor assistance process. The World Bank (hereafter the Bank) acts as Secretariat for the Ad Hoc Liaison Committee (AHLC), and in that capacity facilitates meetings and helps to track donor assistance. The Bank chairs the Consultative Group (CG) for the West Bank and Gaza Strip (to which all active donors belong). The CG meets once a year to review economic developments and the aid program. The CG has assumed a major role in assessing economic conditions and in developing, in association with the PA, packages for donor support. The first such package – the Emergency Assistance Program for the Occupied Territories (EAP) – was presented by the Bank to the first CG meeting in December 1993. The EAP identified sectoral needs and priorities totaling \$1.2 billion for the period 1994-96.

The Bank also developed a more detailed program of its own, the \$128 million Emergency Rehabilitation Program (ERP), involving 117 smaller projects throughout the West Bank and Gaza Strip. The Bank itself has provided \$30 million of its own through its associated aid agency, the International Development Association (IDA), i.e., almost one fifth of the total Bank-pledged loans to the PA.

Outside the ERP, some support for private sector investment is provided through loans offered by the Bank-affiliated IFC. Finally, the Bank is responsible for managing the \$25 million Technical Assistance Trust Fund (TATF) and the Johan Holst Peace Fund (Holst Fund). The TATF – now largely exhausted – has financed technical assistance, particularly in the development of the nascent Palestinian technical and administrative infrastructures. The Holst Fund is used to support the start-up and recurrent costs of the PA. The Holst Fund is chronically short of money due to the PA budget deficit, which is aggravated by Israel's border closure policy, often forcing the Bank and Norway to play the role of emergency fund-raiser.

Since the West Bank/Gaza Strip is a non-member country and therefore not eligible to borrow from the Bank, a Trust Fund was created and Bank surpluses transferred to it. These funds are provided to the Palestinians on IDA (International Development Association) terms -- soft loans at very low interest.¹⁴

3. THE FLOW OF DONOR PLEDGES 1994-96

THE FOLLOWING DISBURSEMENT figures are based on figures put out by the AHLC Secretariat in November 1996:

- (1) Donors' pledges for 1994-96 amounted to \$2489.55 million. This figure represents 83.1% of the total amount initially pledged for 1994-98.
- (2) Total commitments for 1994-96 amounted to \$2324.19 million, 93.4% of the total pledges for 1994-96. This amount has been allocated to specific projects and agreements which have been signed. This also represents 77.6% of total initially pledged amount for the entire period 1994-98. Thus,

three quarters of total pledged assistance to the Palestinians has been already committed to specific projects.

(3) However, as of November 15, 1996, a total of \$1347.66 million had been disbursed, only 54.1% of total pledges for the period 1994-96. This disbursement figure also represents only 58% of total commitments for the same period. Hence, a little over half of what had been either pledged or committed has been disbursed. Only some of these disbursements have been translated to activities on the ground. Furthermore, these disbursements have been partially used for budget support (39.5%) and technical assistance (13.1%). Together, transitional support and technical assistance have absorbed more than half (52.6%) of the total disbursements. The remainder (47.4%) has been allocated for investment projects.¹⁵

This pace of actual aid delivery, as opposed to pledges or commitments, raises critical questions regarding:

whether there were problems in the identification of priorities, programs and projects, and

The implementation and absorption capacity of Palestinian institutions.

Attempting to answer these questions is not easy. Many claim that aid delivery has lagged despite the fact that the structure of aid coordination and delivery was enhanced to tackle this same problem by the creation of the CG, the AHLC and its substructure, which includes the Local Aid Coordination Committee (LACC), Sectoral Working Groups (SWG), Joint Liaison Committee (JLC), the Task Force on Project Implementation, and the UN Special Coordinator's Office (UNSCO). Brynen concludes that "as a consequence [of these problems], structures and programs have undergone significant

FOREIGN AID AND DEVELOPMENT IN PALESTINE

modification over time, in an attempt to improve the pace of program delivery, target aid more effectively, and enhance coordination and local responsiveness."¹⁶

In the remainder of this section, actual donor disbursements will be looked at regionally. The same categories will be used as in the previous section, namely, the Arab World, Europe, Japan, North America, and Other Countries.

3.1 The Arab World

Based on the November 1996 AHLC Secretariat matrix, of the \$393.41 million pledged by the Arab countries and the Arab Fund, \$377.44 (95.9%) has been committed or allocated to specific projects. Actual disbursements by Arab countries totaled \$140.34 million, 10.4% of total disbursements, only about one third (35.67%) of total Arab pledges and 37.18% of Arab commitments.

With regard to specific Arab donor countries, Algeria has disbursed more than half (57.2%) the aid it pledged, 100% of its commitments thus far. Egypt has disbursed 84.2% of both its pledges and commitments. Jordan has disbursed 70% of its pledges and commitments. Kuwait has disbursed 95.5% of its commitments, 84% of its total pledges. The UAE and Qatar have disbursed 100% of their pledges and commitments. Saudi Arabia, the major Arab donor with a two-thirds share of total Arab disbursements, has disbursed 38.4% of its pledges¹⁷ and 40.5% of its commitments.

3.2 Europe

Of the total \$1258.58 million pledged by Europe for 1994-96, \$1259.84 million, or 100.1% of total European pledges, has been committed. Finland, Italy and the EIB actually committed more than they had pledged.

European disbursements currently total approximately \$678.36 million, or 53.9% of total pledges. This figure represents almost one-half of the total disbursements made by the entire donor community.

Within the European domain, the EU is the major donor. The EU's total pledged amount of \$310.72 million for 1994-96 has been committed. The EU commitments represent 24.66% of the total commitments made by Europe as a donor category, and EU disbursements represent 26.16% of all European disbursements. EU disbursements thus far represent 57.1% of its commitments for 1994-96, and 13.17% of all donor disbursements.

The EIB, meanwhile, has committed \$150.5 million for the period 1994-96, more than its pledge totals of \$130 million. However, as of November 1996, none of this had been disbursed.

Norway is the most prominent of the individual European donor countries. Norway's disbursements total 16.14% of the total European disbursements and 77.89% of the country's total pledges and commitments. Norway's disbursements represent 8.12% of all disbursements made thus far by all donors.

- The Netherlands' disbursements represent 32.2% of its commitments, and 30.54% of its pledges. Dutch disbursements total 2.74% of all donor disbursements to date.
- Germany has made disbursements totaling 62.79% of its pledges and commitments for 1994-96, and 24.33% of all donor disbursements.
- Italy has disbursed 4.17% of total European commitments and disbursements respectively, and 2.10% of total donor disbursements. Italian disbursements represent 40.72% of its total commitments.

- Switzerland has disbursed 7.33% of total European commitments and disbursements and 70.88% of its own pledges and commitments. Swiss disbursements represent almost 3.69% of all donor disbursements.
- France has disbursed 3.62% of total European disbursements and 1.82% of total donor disbursements. French disbursements equal 37.74% of its total pledges and 45.12% of its commitments.
- Denmark has disbursed 5.58% of total European disbursements and 2.81% of total donor disbursements. Denmark has disbursed 61.54% of its total pledges and 61.88% of its commitments.
- Spain has disbursed 7.44% of all European disbursements and 3.74% of total donor disbursements. Spain has disbursed 98.02% of its pledges and commitments.
- ➡ Sweden has disbursed 6.44% of all European disbursements and 3.24% of total donor disbursements. Sweden has disbursed 62.83% of its total pledges and 65.34% of its commitments.
- Great Britain has disbursed 2.81% of total European disbursements, and 1.42% of total disbursements.

The rest of the European donor countries (Austria, Belgium, Cyprus, Czech Republic, Finland, Greece, Ireland, Luxembourg, and Romania) have committed 6.17% and disbursed 6.28% of total European commitments and disbursements, respectively. Disbursements by these countries together represent only 3.22% of all donor disbursements.

3.3 Japan

Japan has committed 81.60% of its total pledges and disbursed 92.11% of its commitments. Japanese disbursements represent 14.29% of total disbursements made by the donor community.

3.4 North America

Up to November 1996, US commitments amounted to \$272.62 million, or 12.3% of total donor commitments and 100% of US pledges. Disbursements by the United States totaled \$216.42 million, 79.4% of its pledges and commitments, and 17.8% of total donor disbursements.

Of the US commitments (100% of pledges), 97.26% has been disbursed, representing 16.76% of entire donor disbursements.

Canada has pledged and committed \$33.98 million, or 1.36% and 1.46% of all donor pledges and commitments respectively. Canada has disbursed 76.81% of its commitments, which represents 10.36% of the North American total and 1.94% of total donor disbursements.

3.5 Other Donor Countries

Of the remaining donor countries, Israel has committed 56.18% and disbursed 23.60% (\$10.5 million) of its pledges. Turkey has only committed \$2.86 million, 5.41% of what was pledged; the total amount committed has been disbursed.

Australia has committed \$13.01 million, the total originally pledged, and of this has been disbursed 97.08%. Iceland has not committed or disbursed any of its \$0.9 million pledge.

The Other Asian Countries – Brunei, India, Indonesia and the Republic of Korea – together have committed \$12.14 million, 79.55% of total pledges for these countries. Only Brunei and the Republic of Korea have made any disbursements, however. Disbursements for the two countries are to date \$6.6 million, 0.49% of total donor disbursements.

The World Bank and its affiliate the IFC pledged \$188.75 million, or 7.9% of total donor pledges. Their commitments total \$158.75 million, or 6.83% of total donor commitments. The World Bank alone has disbursed

\$51.94 million, or 3.85% of total donor disbursements; this figure represents only 37.1% of the Bank's total pledges and commitments.

4. SECTORAL PROFILE OF DONORS' ASSISTANCE

4.1 General Profile

THIS SECTION IS BASED on the July 1996 revised edition of "Partners in Peace" which was jointly prepared by the United Nations and the World Bank Secretariat of the LACC. The figures in this section of the report do not necessarily correspond with the figures put out by the AHLC Secretariat. Several reasons account for these discrepancies; first and foremost is that the timeframes tend to differ.

Furthermore, World Bank sectors and the 12 LACC-defined sector working groups also differ. For example, road-related projects are classified under Infrastructure in "Partners in Peace", while in the "Matrix" these projects are classified as either "Transportation" or "Infrastructure". In the "Matrix", the private sector appears as a separate sector under which, for example, donations and loans were disbursed for housing projects. In "Partners in Peace", housing appears as a separate sector with no distinction between private and public housing.

Generally, figures put out by the United Nations Special Coordinator's Office (UNSCO) tend to be more conservative than those of the AHLC Secretariat, possibly because of the more detailed, project-oriented approach.¹⁸

Table 4.1.

STATUS OF DONOR-FUNDED ACTIVITIES IN THE WEST BANK AND GAZA STRIP

OCTOBER 1993 - JULY 1996

SECTOR	% OF TOTAL COM'MENTS	AMOUNT (US\$ MIL)	% OF TOTAL DIS'MENTS	DISBURSE (US\$	D/C RATIO (%)*
				MIL)	
Agriculture	1.3	30.980	1.7	19.598	63.2

* Ratio of disbursements to commitments

Source: "Partners in Peace". The Local Aid Coordination Committee (LACC) for Development Assistance in the West Bank and Gaza Strip. Prepared by the UN and the World Bank, LACC Secretariat July 1996 -Revised, p. 21.

NOTES:

- (i) This figure includes \$25 million from the Holst Fund used to finance public sector emergency employment generation activities implemented by the PA.
- (ii) Donations through the Holst Fund of \$212 million (minus the \$25 million referred to in preceding note) and \$108.315 million from the EU (including the October 1, 1996 pledge of \$25.6 million.
- (iii) Figures taken from August 1996 report of the World Bank at the 5 September, 1996 meeting of the Ad Hoc Liaison Committee in Washington.

- - -

The sectoral profile of aid commitments and disbursements as presented in table 4.1 indicate the following:

- 1. The public sector enjoys the lion's share in total commitments as well as disbursements, accounting for almost 96% of total commitments.
- 2. Start-up expenses and transitional budgetary support, including the recurrent police costs, public finance through the Holst Fund, central administration and new agencies, rehabilitation of ex-detainees, employment creation, additional finance for NGOs, and others accounted for almost half of the public sector disbursements made between October 1993 and July 1996, distributed as follows:¹⁹

Holst Fund (mainly salaries)	44.08
Central Administration and new agencies	10.74
Police	12.59
Rehabilitation of ex-detainees	2.32
Employment creation	16.33
NGOs/new finance	9.88
Other	4.18

- 3. The remainder of disbursements made in this period were primarily to projects in the following sectors: infrastructure (17.2%), education (15.6%), health (8.9%), housing (4.3%), environment (2.3%), agriculture (1.7%), and tourism (0.06%).²⁰
- 4. In total, just over 50% of commitments for the period October 1993 to July 1996 were disbursed. In the public finance, police, education, housing, agriculture and environment sectors, disbursement/commitment ratios were clearly above average, while those for employment creation, health, infrastructure, institution building, private sector and tourism were below average.

5. Technical assistance is not identified in table 4.1 as a separate category. Therefore, the AHLC Secretariat "Matrix" will be used in examining the commitments and disbursements in this area.

Technical assistance commitments for the period 1994-96 total \$279.10 million, about 12% of the total commitments for this period. Of this amount \$176.59 million has been disbursed, a disbursement/commitment ratio of 63.27%. Thus, 13.1% of total disbursements for the period were allocated to technical assistance activities.

Technical assistance is provided in the areas of: infrastructure, economy and finance, human resources, private sector, and other, which includes commitments that do not fit easily into the other categories. Table 4.2 summarizes the distribution of technical assistance funds:

Table 4.2

	% OF TA	AMOUNT	% OF TA	AMOUNT	D/C
Area	COM'MENTS	(US\$ MIL)	DISB'MENTS	(US\$ MIL)	RATIO

Other	44.53	124.29	70.55	124.59	100.24
Total	100	279.1	100	176.59	63.27

TECHNICAL ASSISTANCE 1994-96

Source: The AHLC Secretariat "Matrix"

More than half of the commitments to technical assistance have been disbursed. Human resources received the largest share of disbursements among

FOREIGN AID AND DEVELOPMENT IN PALESTINE

the sectors shown above. The private sector received less than 6% of the total disbursements to technical assistance, while the infrastructure sector received less than one-third of the funds committed to that sector.

The following section is an assessment for each sector of two particular trends:

- (a) the donors' interests in each sector; and
- (b) the projects to which funds were committed.

4.2 Sectoral Profile

4.2.1 Agriculture

Almost \$31 million has been committed to agriculture. Of this amount, \$19.6 million (63%) has been disbursed. Geographical distribution of commitments is as follows: 13% to Gaza Strip, 18% to the West Bank; 37% to the West Bank and Gaza Strip combined, and the rest is unspecified.

Donors to the agricultural sector include: Spain (19.5%), Denmark (12%), Belgium (11.8%), Luxembourg (10.6%), Austria (8.2%), Japan (8.1%), Netherlands (7.7%), France (5.1%), Germany (4.5%), United States (3.7%), UNDP/FAO (3.3%), EU (2.9%), and other countries and institutions (2.6%), each of which has committed less than 1%.

Within the sector, projects can be categorized as follows:

- TA: Technical assistance
- CR: Construction and renovation
- EQ: Equipment supply
- TR: Training
- RC: Recurrent costs
- CDT: Credit

FOREIGN AID AND DEVELOPMENT IN PALESTINE

Mixed: Two or more of the above categories

Unspecified: Others not specified under one of the above categories²¹

FOREIGN AID AND DEVELOPMENT IN PALESTINE

4.2.8 Institution- Building

Commitments to the institution-building sector totaled \$316.01 million, of which 49% has been disbursed. The geographical distribution of these commitments is as follows: 3% to the Gaza Strip, 2.5% to the West Bank, 87.1% to the West Bank and Gaza Strip, and the rest (7.4%) is unspecified.

Commitments to the institution-building sector were made by the following donors: Norway (27.8%), the EU (23.2%), Japan (9.8%), United States (7.3%), Germany (5.2%), Switzerland (4.2%), Sweden (3.2%), Canada (3%), Netherlands (2.9%), Austria (2.3%), Italy (1.7%), UK (1.7%), Australia (1.4%), France (1.2%), UAE (1.1%), and others (4%), of which each committed less than 1%.

Projects in the institution-building sector are categorized as follows:

- TA: Technical assistance
- CR: Construction and renovation
- EQ: Equipment supply
- TR: Training
- RC: Recurrent costs
- CDT: Credit

Some projects did not clearly correspond to any of the designated sectors as categorization of projects was channeled through the twelve sectors identified for the SWGs by LACC. These projects were classified under the institution-building sector after it was noted that almost all additional projects had, to some extent, an institution-building objective. Such projects include election support, rehabilitation of ex-detainees, child/youth and culture-related projects, integrated rural development, democracy and governance projects.²²

-

4.2.10 Police

Commitments to the police sector totaled \$71.9 million, of which 89.6% has been disbursed. During October 1993 - December 1995, salaries channeled to the Palestinian police force (PPF) through the United Nations bridging mechanism (UNRWA) totaled almost \$39.3 million. Additional in-kind gifts and financial support to the PPF of \$32.6 million were committed later on. Of these new commitments, \$25.1 million were disbursed in the period January-September 1996. Donors to the police sector include: the UK, Norway, Sweden, Netherlands, the EU, Saudi Arabia, Denmark, Japan, Greece, Egypt, and the United States.

Therefore, the bulk of aid to the PPF is composed of salaries to support a police force of 24,000 as of the end of December 1995. According to the International Monetary Fund, a wage bill of \$41 million was expected for 1995. However, donor support of the PPF has been extended beyond fund-raising for police salaries. In addition to training, gifts-in-kind played a crucial role in directing this new force toward becoming a professional police force able to serve a civilian population and be accountable to the rule of law. A total of 1353 policemen participated in a variety of training projects, most of them in the Palestinian territories. During 1995, the police force program focused on the need to establish a police academy, to be built in Nablus.

4.2.11 Private Sector

Commitments to the private sector totaled \$85.68 million, of which only 30.2% has been disbursed so far. The geographical distribution of these commitments is as follows: 17% to the Gaza Strip, 0% to the West Bank, 82% to the West Bank and Gaza Strip, and the rest (7%) is unspecified.

Commitments to the private sector were made by the following donors: the United States (45.8%), Germany (18.3%), the EU (17.4%), France (5.8%),

the World Bank (5.8%), Italy (1.9%), Netherlands (1.5%), Spain (1.2%), and others (2.3%) each of which committed less than 1%.

Projects in the private sector are categorized here as follows:

- TA: Technical assistance
- CR: Construction and renovation
- EQ: Equipment supply
- TR: Training
- RC: Recurrent costs
- CDT: Credit

Table 4.12 summarizes the commitments and disbursements in these categories.

FOREIGN AID AND DEVELOPMENT IN PALESTINE - 42

4.2.12 Public Finance

Commitments to the public finance sector amounted to \$321.94 million, of which almost 90% has been disbursed so far; the alleviation of the PA's budgetary constraints has been a major concern of donors.

Covering salaries and other recurrent costs is the most significant of donor activities in this sector. This assistance is channeled through both bilateral and multilateral mechanisms. The Holst Fund has been the primary instrument for multilateral funding of the recurrent budget and start-up activities. The Fund is administered by the World Bank through the Palestinian Ministry of Finance and PECDAR. Since its inception in the spring of 1994, 25 donor countries have pledged a total of \$222.8 million to the Holst Fund, with over \$185 million disbursed. In addition, the EU's support for PA running costs, totaling over \$81 million, provides bilateral support for education and higher education.

4.2.13 Tourism

Total commitments to this sector amount to \$3.882 million, of which 17% has been disbursed. The geographical distribution is as follows: 0% to the Gaza Strip, 15% to the West Bank, 7% to the West Bank and Gaza Strip, and the rest (78%) is unspecified.

Commitments to this sector were made by: Germany (44.6%), Spain (23.4%), Austria (12.4%), UNDP (9.7%), Japan (5.2%), Switzerland (2.1%), Norway (1.3%), and others (1.3%), each of which committed less than 1%. The projects in this sector are categorized here as follows:

- TA: Technical assistance
- CR: Construction and renovation
- EQ: Equipment supply

4.2.14 Transport and Telecommunications

A separate matrix has not yet been provided for this sector. In fact, the last few years have seen little donor interest in institutional projects presented by both the Ministry of Transport and the Ministry of Telecommunications and

FOREIGN AID AND DEVELOPMENT IN PALESTINE -

Post. With an increasing percentage of funds becoming available as loans, few infrastructure projects would be considered by lenders without an institutional framework in place. No substantial funds exclusive to this area were reported. Infrastructure projects such as road-related projects which could be included in this sector were added instead to the infrastructure matrix.

-

5. CONCLUSION

WHILE IT IS STILL TOO early for a full assessment of the impact and longterm consequences of donor assistance being provided to the West Bank and Gaza Strip, there are some preliminary conclusions that can be drawn at this stage. Although the data is not necessarily up-to-date, since such a task is virtually impossible at this stage, trends may be inferred. Questions of project selection, sectoral priority, and choice of development strategy must be asked by local and international policy-makers involved in the nation-state building process ongoing in the West Bank and Gaza Strip.

A cursory examination of the data confirms that one of the most pressing immediate goals is that of political survival, with a significant proportion of foreign assistance having been targeted to transitional budget support and public finance. How long such programs can be sustained is only one of several questions demanding further research.

The situation is exacerbated by the prolonged border closure that has been imposed on the West Bank and Gaza Strip in varying degrees since the Gulf War and most stringently since February 1996. Due to this closure, the donor community has had to shift its focus to funding emergency projects and the PA's budget deficit; in effect the donors have had to subsidize Israeli government policy at the expense of long-term development of the West Bank and Gaza Strip.

There is also the issue of the relative slowness of the delivery of assistance to projects on the ground, visible to communities waiting to see the benefits of Palestinian engagement in the peace process. As of November 1996, only a little over one half of the total monies pledged to the Palestinians had actually been disbursed, and much of that went for the budget support

discussed above, and to technical assistance, often involving highly-paid experts from abroad. Technical assistance received 13.1% of all disbursements thus far, with \$124.59 million (70.55%) of those disbursements falling into the somewhat ambiguous Other category as defined by the World Bank. The biggest TA donor is the United States, of whose contribution 83.59% fell under the Other category. These are substantial amounts, particularly in light of the significant proportion of these funds that are returned to the donor country.

Disbursements to infrastructure, employment creation, health, institution-building, private sector and tourism lagged far behind those to the public finance, police, education, housing, agriculture and environment sectors. Furthermore, within the infrastructure sector, there is no mention of maintenance costs, a significant expenditure to be considered in future. Despite initial relative support to the sector, a quick overview of the projects being implemented on the ground and the World Bank's initiatives suggests that the agricultural sector does not figure prominently in the "impending" development process.

In general, an examination of the data raises questions about the entire process of priority identification and project selection. It is also interesting to examine the relative levels of participation by donors in the political and economic arena. For example, the United States, which plays the leading role in the peace process, is only the third largest donor after the EU and Japan. Moreover, \$125 million of the amount initially pledged by the United States to the Palestinians was channeled through OPIC, the Overseas Private Investment Corporation; in effect, this amount was actually pledged to US investors wishing to invest in the region.

The second and third phases of this project will provide the opportunity to analyze donor assistance in greater depth. The second phase of this project will be analytical in nature. Working with the results of this first data-gathering

phase, the project's aim is to focus on donor and PA agenda-setting within the context of the global political economy and the local conditions affecting Palestinian development. In the third and final phase of this project we hope to produce sectoral and overall policy recommendations targeting the economic development needs of the Palestinian territories.

Endnotes:

¹ Based on the fifth revision, November 1996 "Matrix of Donor Assistance to the West Bank and Gaza Strip".

² Two of the main documents used in this project are: "<u>Partners in Peace</u>" prepared jointly by the United Nations and the World Bank Secretariat of the LACC, revised-July 1996, and "<u>A Matrix of Donors</u>" <u>Assistance to the West Bank and Gaza</u>" prepared by the Secretariat of the AHLC, fifth revision-November 1996.

³ "Commitment" is defined as a firm allocation of pledge monies by a donor to a particular assistance activity, i.e., a project agreement was signed. "Disbursement", on the other hand, represents money transferred out of donor bank accounts against its commitments to the implementing agency. The figure therefore reflects what the donor has disbursed to date, but not necessarily the implementation status of the project, i.e., some disbursements are not yet translated into activities on the ground.

⁴ The figures in parentheses represent the shares of these countries in total grants pledged.

⁵ The category of Europe as a region includes: Austria, Belgium, Cyprus, Czech Republic, Denmark, EU, EIB, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Norway, Romania, Spain, Sweden, Switzerland, and the UK.

⁶ The figures in parentheses represent the specific country share of total European-pledges.

ANNEX I

TRIPARTITE ACTION PLAN ON REVENUES, EXPENDITURES AND DONOR FUNDING FOR THE PALESTINIAN AUTHORITY February 1996

PREAMBLE

The signing of the first Tripartite Action Plan in Paris at the April 1995 Ad Hoc Liaison Committee meeting marked a significant consolidation of the partnership for peace that has been formed by the Palestinian Authority, the Government of Israel, and the donor community. The first Tripartite Action Plan has promoted significant achievements in the economic and social development effort of the Palestinian Authority and the Palestinian people.

The Interim Agreement, signed on 28 September 1995 by the Government of Israel and the Palestinian Liberation Organization, marks the beginning of a new phase of the development effort in the West Bank and Gaza Strip. Following signature of the Interim Agreement, the Ad Hoc Liaison Committee met at the ministerial level in Washington, D.C. The meeting was convened to discuss how the donor community could most effectively assist the Palestinian Authority in its efforts to sustain the political progress marked by the Interim Agreement, by providing further economic and financial assistance to the Palestinian people.

Consensus was reached, that a first and indispensable step in a revitalized process of development stemming from the Interim Agreement would be the consolidation of the progress already achieved towards the balancing of the Palestinian Authority recurrent budget, as well as a commitment to expediting disbursement of donor assistance and reducing impediments to the free passage of goods and persons. Furthermore, it was noted that the success of a medium-term economic development strategy is dependent upon the adoption and implementation by the Palestinian Authority of a legal and regulatory regime favorable to private sector investment and economic development.

The following is a revised text of the first Tripartite Action Plan, which incorporates new understandings on the part of the Palestinian Authority, the Government of Israel and the donor community.

I. Palestinian Requirements and Responsibilities

The Palestinian Authority pledged to fulfill the requirements and responsibilities listed below in cooperation with the Government of Israel and the donor community. It was understood that this revised Tripartite Action Plan would be submitted to the Palestinian Council following its establishment.

A. Fiscal Policy

 The Palestinian Authority commits itself to adhere to the revenue and expenditure targets contained in the 1996 budget submitted to the donor community (see Annex B). It is understood that the revenue collection and expenditure targets in the budget will be viewed as performance benchmarks by donors, subject to the review process noted under Donor Requirements and Responsibilities. This budget will be binding on all ministries and spending agencies, including the police force and

ANNEX I - TRIPARTITE ACTION PLAN ON REVENUES -

PECDAR, for which the Palestinian Authority central administration is responsible.

- 2. The Palestinian Authority will finalize, by end-March 1996, its 1996-98 fiscal and macroeconomic projections. The intended fiscal policy stance underlying the finalized projections will continue to be: (i) to limit the recurrent budget deficit and associated external funding needs not exceeding US\$75 million in 1996; and (ii) recurrent budget balance in 1997 and surplus in 1998, so that no further donor support for the recurrent budget would be called for in those years.
- 3. The PA will continue to co-operate with Israel on tax and any related issues as provided for the Interim Agreement. Any outstanding issues will be resolved in the Joint Economic Committee.
- 4. The Palestinian Authority will work with the Government of Israel to settle outstanding May-December 1994 VAT clearances for the Gaza Strip and the Jericho Area and resolve other revenue issues in the Joint Economic Committee by 31 December 1995.
- 5. The Palestinian Authority will work to ensure the achievement of the fiscal stance referred to at Article 1 and 2 of this section. The Palestinian Authority will continue to work with the International Monetary Fund and implement the recommendations of the latter on strengthening revenue administration and expenditure management, according to the agreed schedule (see Annex D).

In particular, the Palestinian Authority will strengthen fiscal expenditure management by appointing Directors-General and senior staff of the Treasury Central Budget Office and Internal Audit Unit within eight weeks of the signature of this Plan. The PA will also continue to improve revenue administration, including customs administration, particularly through computerization.

- 6. The Palestinian Authority will, over the next twelve months, work to create budgeting, financial control and internal audit systems within the major spending ministries or departments, including the ministries of Education, Health, and Social Welfare, and the Police.
- The PA will centralize all fiscal revenues (domestic and clearances), fiscal expenditures and external assistance receipts in one central account, under the direct control of the Ministry of Finance by 31 January 1996.
- 8. The PA will pursue in 1996 a prudent civil service and police force recruitment not exceeding the numbers and cost structures outlined in the 1996 budget, and a prudent wage policy, and will ensure that any additional recruitment and wage bill expenditure is contained within the overall expenditure ceiling imposed by the 1996 budget and is consistent with fiscal sustainability. In this connection, the PA will undertake a human resources planning exercise, to be completed by June 1996, to identify optimum staffing requirements and the fiscal implications of any changes. The Palestinian Authority will continue this policy consistent with its 1996-98 fiscal and macro-economic projections.

B. General Economic Policy

1. In order to facilitate the movement of persons and goods in and out of the West Bank and Gaza Strip and between the West Bank and Gaza Strip the Palestinian Authority will appoint a Palestinian Liaison Officer for each crossing point in the West Bank and Gaza Strip to work with an Israeli counterpart to address situations as they arise. The Palestinian Authority will put in place sufficient staffing to ensure that delays on the Palestinian side of crossing points are minimal for the passage of commodities and authorized people.

- 2. Any equipment, goods or materials imported for development projects financed by donors will be exempt by the PA from all custom and import taxes and duties. The PA will also expedite the repayment of VAT received on donor-financed projects. The Palestinian Authority and the Government of Israel will discuss these issues in accordance with Annex V, Article III, paragraph 19 of the Interim Agreement.
- 3. The PA will take the following actions to establish three industrial estates, by March 1996:

(i) establish and mandate a team to develop and finalize with the Government of Israel the enabling environment for the industrial zones;
(ii) establish an autonomous Palestinian Industrial Estates Authority;
(iii) designate specific sites for the construction of the estates;

(iv) establish the legal basis for the estates;

(v) facilitate the work of private developers for the selected sites and continue to work with donors, the World Bank and the United Nations on this program.

- 4. The Palestinian Authority and the Government of Israel will expedite negotiations on the Gaza Harbor, consistent with the Interim Agreement.
- 5. The Palestinian Authority will establish a high-level Commission on Public Administration. The Commission will make recommendations for clarifying the mandates of those ministries and agencies with a central involvement in economic policy formulation and in the programming and implementation of donor assistance, namely the Ministry of Finance, the Ministry of Planning and International Cooperation, the Ministry of Economy, Trade, and Industry, the Palestinian Monetary Authority, and PECDAR. In formulating its recommendations, the Commission will also take into consideration any implications for staffing.

FOREIGN AID AND DEVELOPMENT IN PALESTINE

The Commission will also examine ways to strengthen cabinet-level decision-making and inter-ministerial co-ordination.

The Commission will submit a report containing its formal recommendations by end-June 1996. In its deliberations, the Commission may find it appropriate to consult the donors. Expert consultants will be provided upon request by the World Bank, the United Nations or donors to assist the Commission.

- 6. The PA will designate a single agency to produce a report articulating sectoral development and project priorities for the short-term and medium- term. The report will be consistent with the medium-term economic development strategy. The report will take into consideration that, in line with the fiscal commitments of the Palestinian Authority, the priority investment projects should not lead to significant increases in permanent public sector employment or recurrent expenditure. Accordingly, the Palestinian Authority's 1996-98 fiscal projections will include the recurrent cost implications of investment projects, including the core projects presented to the World Bank Consultative Group on the West Bank and Gaza Strip on 18-19 October 1995.
- 7. These projects and sectoral priorities must form the starting point of a process of capital budget formulation and estimation. To this end, the Palestinian Authority will, within the PA agency so designated, and with World Bank, United Nations and donor assistance, begin, by March 1996, a proper process of investment program formulation, decision-making and implementation.
- 8. The Palestinian Authority will continue to promote decentralization of, and participation in, project design and implementation through enhancing the role of municipalities, village councils and NGOs. The

ANNEX I - TRIPARTITE ACTION PLAN ON REVENUES - 56

-

Palestinian Authority will also encourage private sector participation in financing and managing public infrastructure and services.

- 9. The Palestinian Authority in conjunction with the World Bank, the United Nations, and interested donors will finalize by April 1996 a housing development strategy which will include a program of housing finance, private housing construction and urban renewal.
- 10. The Palestinian Authority will work towards implementing the investment promotion law, creating the Palestinian Investment Promotion Agency, and establishing the regulatory framework for private sector investment. These steps will be completed by end-March 1996.
- 11. The Palestinian Authority will provide written information on a monthly basis to the Local Aid Co-ordination Committee secretariat on the transfer of revenue, and on all available information on the flow of persons and goods, as well as measures being taken to enhance these flows.

II. Israeli Requirements and Responsibilities

The Government of Israel, in cooperation with the Palestinian Authority and the donors, pledged to fulfill the following requirements and responsibilities:

A. Fiscal Policy

1. The Government of Israel will continue to co-operate with the Palestinian Authority to ensure the smooth functioning of revenue collection in the West Bank and Gaza Strip, especially for the newly transferred spheres of activity, and ensure that agreed taxes accrue to the Palestinian Authority, pursuant to the 28 September, 1995 Interim Agreement and all other relevant agreements.

- 2. The Government of Israel will continue to transfer to the Palestinian Authority on a timely basis all revenue clearances due pursuant to the Interim Agreement and all other relevant agreements.
- 3. Upon request the Government of Israel will provide training to Palestinian tax advisors and customs administration employees.

B. General Economic Policy

The parties to the Tripartite Action Plan respect the obligation of the Government of Israel to provide for the safety and security of its citizens and recognize that security measures remain necessary owing to the continued threat of violent attacks.

At the same time, the parties take note of current and serious efforts undertaken by the Government of Israel to remove measures that have proven impediments to the achievement of sustained economic growth in the West Bank and Gaza Strip.

The parties encourage the Government of Israel to take further steps to remove restrictions that have created so far significant disincentives, and in many cases prevented private sector economic activity, and to examine ways to bridge its security needs with the need to allow economic activities performed by Palestinians, which in turn will create the necessary growth in the PA's fiscal revenue.

1. The Government of Israel will work with the PA, consistent with the Interim Agreement, to take all necessary steps to facilitate the movement of goods and persons in and out of the West Bank and Gaza Strip.

ANNEX I - TRIPARTITE ACTION PLAN ON REVENUES

In order to achieve this, the Government of Israel will designate by the end of January 1996 an Authority responsible for dealing with all issues related to the crossing of persons and goods. This authority will be represented at the crossing points to Israel and will co-operate with Palestinian liaison officials appointed by the Palestinian Authority.

Measures to be taken in this regard will include:

(i) Facilitating the movement of business persons, VIPs, donor project staff and Palestinian Authority personnel, consultants and advisory representatives. Persons registered in these categories will be given permits.

(ii) Ensuring the regular and orderly passage of diplomatic, consular, International Monetary Fund, World Bank and United Nations personnel and their staff.

(iii) Expediting the movement of commodities in and out of the Gaza Strip and eliminating unnecessary delays.

(iv) Expediting the movement of authorized persons at Israeli crossing points.

(v) Giving special attention to the transit of goods and persons in and out of the industrial zones in order to make full economic use of these zones.
(vi) Developing facilities and staffing within Israel's possibilities to ensure that delays at Israeli crossing points are minimal for the passage of commodities and authorized people. Donors will consider methods of assisting Israel in this respect.

The Government of Israel will inform the Palestinian Authority and all relevant and affected parties through the LACC secretariat on a timely

and detailed basis of all procedures and measures taken and planned related to the transit of goods and persons.

- 2. The Government of Israel will ensure arrangements for the safe passage of persons and goods between the Gaza Strip and the West Bank, consistent with Article 3g of Annex II to the Declaration of Principles and with the Interim Agreement. The Government of Israel will also work with the Palestinian Authority to expedite the passage of persons and goods between the Gaza Strip and Egypt, and between the West Bank and Jordan consistent with Article 4 of the same Annex. In addition, the Government of Israel will ensure free movement of persons and goods between different parts of the West Bank consistent with the Interim Agreement.
- Israel will co-operate with the Palestinian Authority to launch at least three industrial zones as early as possible in 1996, consistent with the 28 September Interim Agreement, by:

(i) establishing and authorizing a team to negotiate and finalize the enabling environment for industrial zones, including security arrangements and guarantees for free movement of goods, services and investors;

(ii) agreeing on selected sites for industrial zones, and for appropriate zoning for those selected sites in the West Bank;

(iii) designating a single relevant authority for issuing permits and other functions to the Palestinian Industrial Estates Authority as appropriate to provide a one-step window for dealing with international, Palestinian and Israeli investors; and

(iv) striving to complete, together with the Palestinian Authority, the detailed framework agreement before March 1996.

- 4. The Palestinian Authority and the Government of Israel will expedite negotiations on the Gaza Harbor, consistent with the Interim Agreement.
- 5. The Government of Israel will facilitate the smooth transfer of responsibilities for matters of land registration and building permits to the Palestinian Authority in accordance with the Interim Agreement.
- 6. The Government of Israel will provide written information on a monthly basis to the Local Aid Co-ordination Committee secretariat on the transfer of revenue. Furthermore, Israel will strive to provide available information on the flow of persons and goods, as well as measures being taken to enhance these flows.

III. Donor Response

The donors, in response to the presentation of the Palestinian Authority and the Government of Israel, undertook to proceed as follows:

- 1. Donors will promptly pay outstanding 1995 pledges.
- 2. Donors will intensify their efforts to assist the Palestinian Authority in achieving sustained economic growth, notably by taking measures to promote trade with, and private sector investment in, the West Bank and Gaza Strip.
- 3. The donor community is encouraged by the commitment of the Palestinian Authority and the Government of Israel in this revised Tripartite Action Plan to ensure the timely implementation of development projects. Following the 28 September, 1995 Ad Hoc Liaison Committee Meeting and the 18-19 October 1995 Consultative Group Meeting, the donor community will direct its efforts at supporting the overall medium-term economic development strategy presented by

the Palestinian Authority, including providing financing for core investment projects. (See Annex A.)

For 1996, the donor community will strive to commit at least US\$865 million and to disburse at least US\$500 million.

- 4. The donor community welcomes the presentation by the Palestinian Authority of a consolidated 1996 budget based on the principle that revenues should lead expenditures. In view of the Palestinian Authority's commitment to adhere to the fiscal and overall macro-economic policy stance specified in this budget, donors pledged to provide US\$75 million in recurrent cost financing in 1996 with the time-bound pledges. This recurrent cost support will be guided by quarterly reviews of the revenue collection and expenditure performance of the Palestinian Authority. In particular, a detailed mid-term review covering the first half of 1996 will be undertaken by the Joint Liaison Committee which will make recommendations to the Ad Hoc Liaison Committee.
- The donor community welcomes the Palestinian Authority's preliminary medium-term fiscal and macroeconomic projections for 1997-98.
 Donors expect that the finalized projections, due by the end of March 1996, will continue to reflect the clear understanding that donor support for recurrent costs will not continue beyond 1996.
- 6. The donor community, the World Bank, the International Monetary Fund and the United Nations stand ready to assist the Palestinian Authority with the implementation of provisions contained in this revised Tripartite Action Plan, including clarification of the responsibilities of the economic ministries and agencies. In addition, donors will consider favorably assisting the Palestinian Authority with the design and implementation of employment generation schemes and pension plans which would

ANNEX I - TRIPARTITE ACTION PLAN ON REVENUES -

contribute to restraining growth in the number of public sector employees, including the police force.

7. The donor community stresses the importance of Israel and the Palestinian Authority's adopting policies to promote private sector development of the Palestinian economy.

IV. Monitoring of the Implementation of the Tripartite Action Plan

- 1. The Palestinian Authority, in conjunction with the IMF, will continue to prepare quarterly reports on revenue collection and expenditure performance and prospects, as well as institution-building, for submission to the Ad Hoc Liaison Committee. The Joint Liaison Committee through its secretariat will review progress by all other areas addressed by this Tripartite Action Plan Coordination Committee.
- 2. In mid-1996, the Joint Liaison Committee on behalf of the Ad Hoc Liaison Committee will undertake a budget performance review with the Palestinian Authority, treating revenue collection and expenditure targets contained in the Palestinian Authority budget as performance benchmarks. Following consultations with the Local Aid Coordination Committee, the Joint Liaison Committee will make recommendations to the AHLC concerning donor support for recurrent cost for the remainder of 1996.
- Donors will prepare quarterly reports on commitments, disbursements and project implementation, for submission to the Ad Hoc Liaison Committee through the Joint Liaison Committee Secretariat.
- 4. The Local Aid Co-ordination Committee will be briefed on a monthly basis by its secretariat on the basis of information provided as stipulated in sections II.B.11 and I.B.6.

- 5. The Palestinian Authority and Israel will send representatives at an appropriate level who will have the authority to engage in substantive discussions on all issues related to the provisions of the Tripartite Action Plan.
- The Government of Israel and the Palestinian Authority report to the Joint Liaison Committee on the outcome of discussions held in the Joint Economic Committee on agenda items relating to fiscal issues bearing on donor activities.
- 7. This Tripartite Action Plan should be reviewed at the end of 1996.
